Jérôme Lejeune

The freedom of a savant

Biography of reference on Jérôme Lejeune, a scholar at the service of the weakest.

Key points :

- Biography written by the postulator of the canonization cause.
- 11 years of work based on 15 000 archives.
- Several unpublished documents.
- An extraordinary scientist who discovered Down's syndrome and who spent his life healing and working for people who were suffering.
- A friend of Pope Jean-Paul II.

The intelligence of one person can be a gift for the whole of humanity. This is the thought that springs to mind when thinking about the life of Professor Jérôme Lejeune, who put his incredible intelligence and deep faith to the service of mentally handicapped children. Pioneer of modern genetics, especially through his discovery of Down's Syndrome, Professor Lejeune made his mark on history by following his conscience with heroic bravery as a loyal doctor to the Oath of Hippocrates and as a Christian faithful to his Baptismal Vows.

The story of his life takes us from the Holy Father Jean-Paul II to the Sovietic Léonid Brejnev, to the child Pedro suffering from Down's syndrome, to the very Christian King Baudoin, to laureates of the Nobel Prize to the humblest of patients, in a succession of events sometimes worthy of a detective novel. Pope Jean-Paul II, who called him "Brother Jérôme" went to pray at his grave during the 1997 World Youth Days in Paris.

His canonization process is now underway in Rome.

On Monica, the mother of Saint Augustine

How does one become the mother of a giant of holiness like Augustine?

Key points :

This is the first biography in decades on Saint Monica.

On the mother of one of the greatest saints in the Church.

And by a confirmed specialist of early Christianity who also excels in bringing the story to life for the general public.

It is only through Saint Augustine's "Confessions" that we know about his mother, and what a mother she is ! A model for Christians who witnesses with great pain the dissipated life being led by her brilliant son on whom Providence has yet to shine. It is a long and painful wait but which will result in the ultimate and pinnacle, the conversion of Augustine who will go on to become one of the greatest saints and theologians of the Church. So how can the life of the mother who brought him to such a destiny be overlooked ?

Possessed

How I was freed from the devil's snare

Are spiritism and esoterism danger-free ? A testimony to make your blood run cold.

Key points :

-A rare testimony on a much ignored danger

-A testimony measuring the dangers lying in ordinary spiritism and esoterism

-Author who makes a lot of conferences testifying to his experience

-With contributions by Thomas Oswald.

We have all heard of people who communicate with the deceased. And who have had recourse to healers using pendula or played with ouiji boards. Yet who has really measured the dangers of these activities ? Michel Chiron had the experience of being possessed by the devil and his testimony is extraordinary. Firstly because he describes this experience without the "special effects" and with an absolutely convincing precision, confirmed by the exorcists who liberated him and which exclude mental issues, Secondly because he is denouncing very common practises whose real danger has never been measured. Michael Chiron testifies about being possessed and, via his recourse to exorcism, the subsequent path to inner healing. His testimony is also a valued warning against the traps of the use of the paranormal and all the in-vogue esoterism practises.

Demonstration of the scientific reality of NDEs.

A "continuity of consciousness" independent of cerebral activity indeed exists.

NDEs support a realistic approach to Christian anthropology

Is there life after death? There are increasing testimonies and studies on those considered dead, and who claim to have returned from "another world", a « magnificent » world. Far from trivial, their vision of life from then on is transformed and fear of death is dissipated.

What if these « near-death experiences » (NDE) were really true ? That life really is stronger than death, and that Life indeed exists after life ? However exceptional these experiences may be, they are the subject of serious scientific studies, arousing the interest of the Church to the same extent as other mysterious events such as apparitions or miracles.

Using significant testimonies, this book searches for clues and imparts valuable information, both in terms of reason as in terms of faith, providing elements to respond to that great question of our passing. The author, a physician and a Catholic, is former head of the Office of Medical Observations of Lourdes, who has reached the conviction that these NDEs would really seem to be a sign from heaven, a reminder of our spiritual nature, and which open us to the invisible Life. Believers or unbelievers, just passing on this earth, should we not be preparing for another Life?

A love which burns

For those who have always wanted a letter from Christ.

Magical and timeless... Christ talks to each one of us through the writings of Father Michel-Marie.

Key points :

- An original text where Jesus talks directly to us through the words of Michel-Marie Zanotti-Sorkine
- An extraordinary priest and author of several best-sellers
- A book for the wide public, and not just reserved for Christians, addressing people from today, about the issues of our era, as if Christ were back among us today.

"Christ does not always get good press, and that's unfair ! Many of us these days just either don't care or even worse criticize Him without having ever read a word of the Gospels ! Jesus of Nazareth has to deal with the teething problems of a Church which has too often been judged severely with also its own storms to weather.

So to reverse this tendency on prejudice and generalisations , I've had an idea : give Christ back the chance to speak, let him speak to us as we would a friend. In this book, Christ talks freely. Once again he tells his story, making us enter his thoughts free from any false interpretation and, by doing so, he can enter our times and illuminate it with his Light."Michel-Marie Zanotti-Sorkine

The road to Nazareth

Spirituality for every day

Spirituality of the life of the Holy Family of Nazareth

Key points :

The author is the Bishop of Bayeux

"This remarkable work" as Father Voillaume said, restores the honour of a movement initiated in particular by Charles de Foucauld. One day, God stopped at Nazareth. He has not only give it a human meaning, but has also filled the place with His presence. Nazareth has symbolically become the place and the time where man can develop his essential humanity and holiness.

With a personal approach, Jean-Claude Boulanger relates the experience of Nazareth through two of the most beautiful figures who have emerged from this place : Mary and Jesus. Mary will be the model of welcome, listening, abandonment and trust. Jesus will reveal the true face of God on earth. Nazareth is the path that God took to join humanity. Finally the author describes the meaning of Nazareth for our era, through our relationship with time, with others and with God.

Sons of Light in difficult times

A Friar's words on unity in times of adversity

Why do Catholics quarrel when they should be sons of light ?

Key points :

- Aglobal, monastic vision of the quarrels between Catholics
- Author of several books on spirituality.
- Aspiritual text of great depth reaching the very heart of the reader

Doctrinal conflicts, liturgical quarrels, pastoral divergence, how to face abuses in the Church, conflicts between people, schools of thought, conflicting sensitivities... for several decades reasons to fight in the Church seem to have grown considerably. Conflicts are becoming more serious and tough.

Thus too often Catholics tear each other apart...and what hurts the most is how they do so. This spiritual reflexion from an expert monk wants to help Christians become children of light and peace makers again. Peace is the result of justice and obedience. It neither lies in power relationships paralysing potential fighters nor in a cowardly dismissal in order to avoid scandal. Peace can be brought back to the table when each guest accepts the risk of being upset but can still feel he is respected.

When the Saint of Lisieux, Thérèse, talked to mystics

And shook their lives

The determining influence of Thérèse de Lisieux on the lives of famous personalities from contemporary spirituality

Key points :

- Unknown side of the spiritual and mystical posterity of Thérèse de Lisieux
 - A concrete example of the communion of saints
 - The author is a great specialist of spirituality and mysticism
-

As she lies "dying" one night, Thérèse appears to a Portuguese clarisse and cures her before making her aware of her forthcoming mission. A few years later, Thérèse appears to a Spanish peasant girl to invite her to become a disciple of the Divine Mercy of God. Neither had ever heard of Thérèse before. She heals Marthe Robin and Thérèse Neumann, with whom she maintains a privileged mystical relationship. And so up until recent times there are about a dozen of such examples of incredible appearances by the one who said she would spend her life in heaven to do good on earth...

This book reveals an unknown side of the actions and influence defying our human understanding of Thérèse the Christ Child by showing the very concrete aspect of the mystery of the communion of saints.

Unless you are particularly hardened or that you respectfully keep Jesus at a distance, it is hard to approach his Heart burning with love without being burned by his charity, his sanctity and thus shine in turn ourselves. They will see in you a disciple of mine

What makes us Catholic

From a concrete perspective what is it that makes us Catholics in every day life ? Is it simply because we believe or because we act in a particular manner ? A book of fundamentals.

Key points :

An accessible reference book

A book which provides major benchmarks to live as a Christian. Putting into practice the teaching of the Church

The author has a long experience in the preparation of adults for baptism.

We often think that being a Catholic amounts to believing a certain number of truths or that is a simple philosophy of life.....But is it not more than this ? Is it not a unique encounter with a being who is Jesus Christ who transforms our existence and who ensures that our actions can no longer ever be the same

But in more concrete terms what does that mean ? This short book addresses those who wish to understand simply what it means to live as a Christian and provides accessible concrete reference points for today's world : what does the Catholic do ? How does he live, in the Church, in society ? How does he position himself with regards to others ? On which criteria does he act ? How does he live his faith beyond his private life ? Up until which point should he invest himself ?

This is the story of over 150 years of miraculous healings taking place at the Sanctuary of Lourdes, a sanctuary of Mercy and Charity which has been welcoming pilgrims and the sick from all over the world. The Office of Medical Observation has always witnessed the same mystery : each pilgrim coming to testify the grace of healing he has received also testifying to feeling the strength of the grace throughout his whole person and right through to his very heart.

This book recounts the most beautiful of all the healings to have taken place and which are all characterized by the inner transformations of the one who has been cured, completely transforming their vision of life. Also included are the most recent testimonies which have come to deepen the ever growing brightness of the mystery of the healings at Lourdes.

Why did the majority of Jews reject the Christ ? Did Jesus actually set about founding a Church ?

The basics to help make children discover the wonders of human love.

Key points :

- New edition updated and completed
- Enriched by the theology of the body teaching by Saint Jean-Paul II.

It is essential for children that their first education on the subject of love and sexuality be delivered by their parents and long before puberty. From this observation, the author has made a complete book

: providing a structure for parents of points of reference and the foundations of human love. It is also educational by age-related conversations and methods adapted to every age (a practical book completes the text for children aged 3-12). Christians, and the grace to be free.

Beyond conformity and fear

Being a Christian is not the blind acceptance all kinds of dogmas and prescriptions. It is rather a learning of freedom.

Key points :

A timely reflexion in the current downward trend of Catholicism

A message of hope, christianity still has the buds with which it can blossom

Providing reassurance in our angst-filled society

Faith gives us the chance to look objectively on received ideas such as today's sources of anxieties. An independent mind is not a conquest but a grace with which we have been bestowed. We are handed responsibility in this autonomous world of reality. It also encourages us to discern, confront and disarm evil as a non-accomplice. Journeys of discovery or rediscovery have in this way rekindled faith in the 20th C. These developments have also managed to throw us off track. This can also explain why the Church is undergoing a certain crisis. But there is already so much material on offer to feed the aspirations of those who hear the calls for freedom for the world of tomorrow.

The Best Catholic Jokes

From a Parish Priest

Tears of laughter with over 500 funny stories about Catholics, faith and God, from France and around the world.

Key points :

-Illustrations by Guézou, author of several humouristic collections.

Faith and laughter, faith and humour...a hard and complicated combination.

Or is it ?

Faith is serious, so faith will usually be linked to seriousness. Did Jesus ever laugh ? There is no trace in the Gospel. Yet our author is convinced of it. As, according to the Christian philosopher Boèce and taken joyfully further by François Rabelais. what sets the human being apart is his capacity to laugh. And as Christ was also man, he would naturally have experienced good, hearty humour and laughter.

Without any Catholic or spiritual focus in mind, this is a joyful collection of over 500 stories gathered from France and from around the world, taken from real-life situations or pure fiction. How best to handle our peculiarities, our simple humanity, our narrow-mindedness... if not by poking fun ?

When it seems appropriate to look serious, laughter can become as precious as a pearl... so read on to discover the whole string !

Masonic secrecy, Catholic truth

What I discovered from within the shadows of the Lodges.

A testimony on secrecy in freemasonry by a former Master Mason.

Key points :

Serge Abad-Gallardo converted to the Christian faith in 2012.

Testimony from a former Master Mason who spent over 20 years of his life as a Mason.

A rare exploration of the use of secrecy in freemasonry.

He travels extensively to give international conferences.

Serge Abad-gallardo has previously been translated into German, Polish and Spanish.

This essay describes the nature, use, aims and effects of secrecy in Masonry.

Using numerous masonic writings and quotes, veritable references in the domaine of freemasonry, Serge Abad-Gallardo confirms the conclusions he reached throughout his whole experience as a Mason before converting to the Christian faith in 2012, Pure fantasy for some, for others pure danger for the salvation of our souls, open secrets, incommunicable experiences, happenings the existence of which is either denied or exacerbated, for some paths of privilege towards knowledge, for others strategies allowing for professional or political success, in short masonic secrecy is polymorphic and, according to our author, no less real or no less valid for that. Serge Abad-Gallardo comprehensively unveils the consistencies of the shroud of mystery and secrets enveloping Masonry.

The Long Walk of the Chinese Catholics

A panorama of the long and painful history of the Catholics of China til the present day

Key points :

A historical and contemporary vision with the recent Vatican/China agreements.

Includes the view points of contemporary witnesses such as Cardinal Zen and members of the underground Church.

Yves Chiron is a fine connaisseur of Vatican/ State relations and religious history, and more personally of China where he has spent considerable time.

A magnificent and moving history of persecuted Christians

The history of Christianity in China extends as far back as the 7th Century. It is a long series of missions and persecutions to culminate after the 2nd World War with the arrival of Communism. China's 137 dioceses and 3 million Catholics will be subjected to the direst of persecutions. In the 50s a 'patriotic' church will be founded in a bid to avoid external atheistic influences on Chinese Catholics and so a persecuted underground church will thus develop. Despite tensions, this situation will prevail until the agreements of 2018 which according to reputable officials such as Cardinal Zen sign the "death warrant of the underground Church".

A tragic period, both past and present, depicted by Yves Chiron in his very latest historical essay.

The Petite Vie of Don Bosco

Key points :

- an educator who is still up to date with our times
- first-hand historical documents

Don Bosco was stubborn, rigorous and tempestuous. He created in Turin a work for poor, marginal youth. He is at the origins of the Society of St. Francis de Sales (the Salesians) and of the Institute of the Daughters of Mary Help of Christians. During his lifetime, his foundation quickly became international. As a confidant of Pope Pius IX, he intervened in the appointment of the bishops of a unified Italy. Throughout his life he worked to spread a popular culture. Based on first-hand documents, the author shows us the true face of an educator and a pedagogue who remains modern to this day.
